Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to applicant's amendments submitted 1 November 2006.

Allowable Subject Matter

1. The indicated allowability of claims 2-5 is withdrawn in view of the newly discovered reference(s) to Ward. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 3-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Ward (US 2004/0127859).

Regarding claims 1, 11, 13 and 14, Ward teaches a flush syringe assembly comprising a barrel (20), a plunger (14), stopper (70), and an annular boss (proximal portion of distal wall above 76).

Regarding claim 3, the inside surface of the distal wall is conical (Fig 3) and the boss is raised from the surface

Regarding claim 4, the distal surface of the stopper is conical (Fig 3).

Regarding claims 5 and 12, there is a projection (72) on the stopper.

Art Unit: 3767

Regarding claims 6 and 8, there is flush solution (saline or heparin) in the syringe (P0034).

Regarding claim 7, there is a tip cap (36).

Regarding claim 9, the stopper is rubber (P0035).

Regarding claim 10, the device further comprises a needle assembly (not shown, see P0006).

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 3-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsai (US 2004/0024366); Davis (US 5,098,402).
